Revolutionize PFPs Into Digital Clones

Alterim AI aims to revolutionize digital identities within the Web3 ecosystem by enhancing the interactivity, functionality, and accessibility of PFPs.

By leveraging AI, the platform turns static PFPs into living digital entities.

This approach not only *enhances personal identity representation* in digital spaces but also *expands the utility and value of NFTs.*

By doing this, Alterim AI is poised to create a vibrant and interactive digital environment.

Limitation of PFPs

The limitation of PFPs restricts their potential to fully represent users in various online platforms and activities

Demand for Enhanced Digital Identity

Users **seek to integrate their PFPs into their digital identities** to reflect their personalities and participate in digital activities.
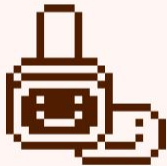

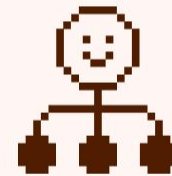

Limitations of PFPs: Static and lack interactivity

Current PFPs **do not offer interactive & functional feature**, lacking the capability for social interaction or economic activities.

Cross-Chain Barriers

Many PFP projects **are confined to specific blockchains**, limiting accessibility across different platform.

Alterim.ai: Making PFPs Represent Digital Identities

Alertim.ai aims to solve the limitations of PFPs by leveraging AI in Web3 ecosystem

Dynamic
Digital Identities

Alterim AI transforms PFPs into AI-enhanced Digital Clones with unique personas. This makes digital identities **more engaging and functional.**

Personalized
Interactions and Utility

Users **can create and customize Digital Clones** that evolve and adapt.

Also, by enabling PFPs to participate **in social interactions, and gamified trading**, Alterim AI adds significant value to these digital assets

Multi-Chain
Supports

Alterim AI **supports multiple blockchain ecosystems**, ensuring broader accessibility

Clones autonomously engage with other Clones

Practical utility and ease of use

- Supports multi-chain and user-friendly interface covering both mobile and web
- Integrates with Telegram to provide mobile accessibility

Introducing Alterim AI's Telegram Mini App

Alterim.ai is developing a **Telegram mini game** designed to engage users through interactive and gamified experiences. Users nurture a **Soul** through chat interactions and various activities within the app.

Key Features

Chat-Based Interaction: Daily chat limits, emotive responses, and a point system.
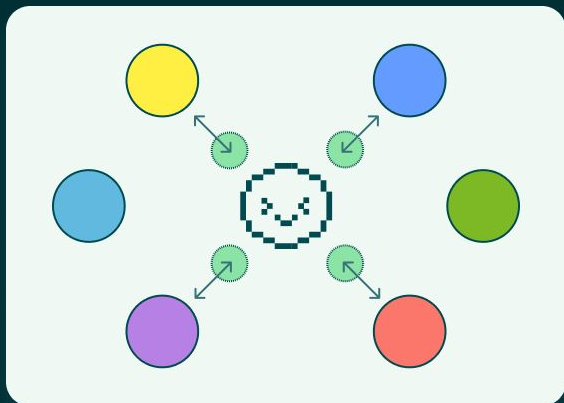

Nurturing 'Soul': Customize backgrounds, charge the 'Soul', and improve affection levels.

Referral System: Rewards for inviting friends.

Item Shop: Boost items, accessories, and backgrounds.

Cross-Marketing Initiatives

Partnering with other Telegram mini apps to create quests and missions. This strategy aims to lower user acquisition costs and introduce Alterim AI to a wider audience.
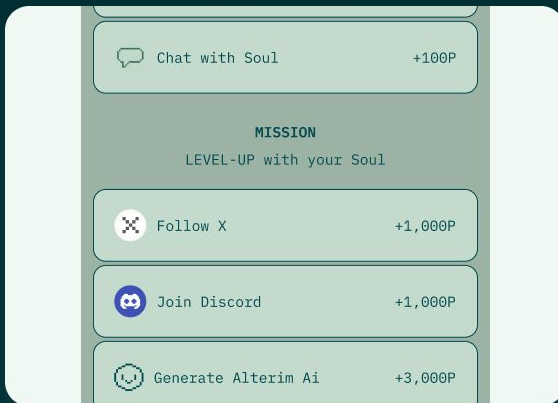

Quest/Mission Integration

Users complete tasks in partner mini apps, which earn them rewards in Alterim AI. This engagement drives traffic and interaction.
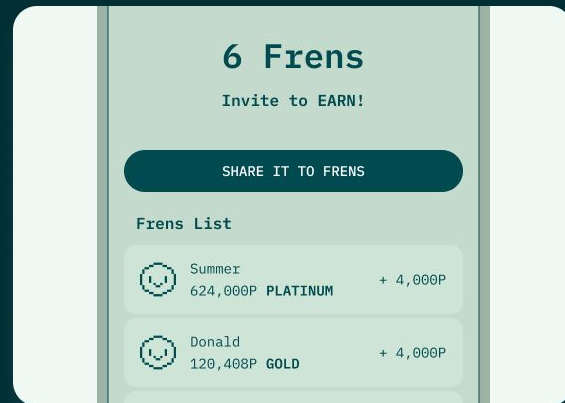

Referral Program

High-engagement users can exchange their achievements for NFTs from the Genesis PFP collection, integrating with Alterim AI's broader ecosystem.

Connecting the Alterim Universe
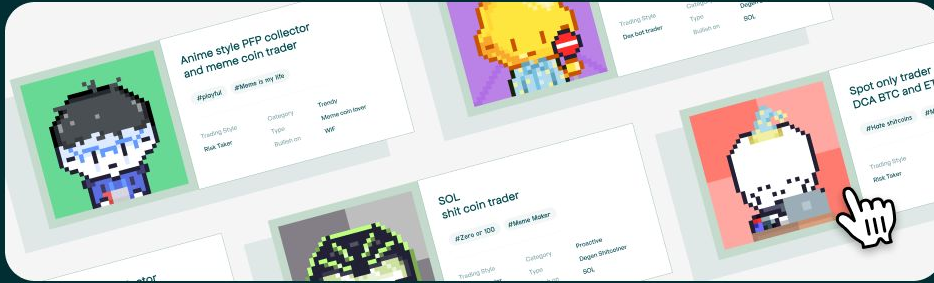

Seamless Integration of Mobile and Web Experiences:

Alterim AI connects mobile and web experiences through a unified platform. The Telegram mini app provides on-the-go interaction, while the web dapp offers deeper functionality and explores the Alterim universe. Together, they create a seamless and integrated user experience.

Genesis PFP NFT Swap

Upon launching our Genesis NFT collection, we will incentivize engagement by linking it with the 'Soul,' further connecting it within the Alterim universe. This approach ensures that our early supporters continue to receive valuable incentives and rewards throughout their journey with us.

AI-Enhanced Digital Clones

Transform static PFPs into **interactive, AI-driven digital clones.**
We offer **dynamic digital identities** with a richer, more engaging experience than static NFTs.

Growth Strategy for Alterim.ai

User Engagement

Offer daily interaction and airdrop on Alterim.ai website and Zealy

New User Acquisition

Launch promotions on QuestN by offering rewards for completing tasks

Raising awareness

Collaborate with KOLs in NFT community to boost credibility

Building Brand

Partner with prominent NFT projects in Solana and Ethereum
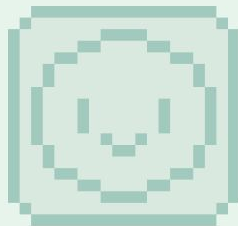

Business Expansion

Develop Telegram mini-apps for TON, and integrate Solana wallets

Product Roadmap

2024 Q3

- MVP launch and AI optimization
- Strategic partnerships with NFT communities
- Solana integration

2024 Q4

- Open Beta Testing (OBT)
- Strategic Chain Integration with NFT-focused chains
- Introduce Stake and Earn feature
- CEX listing

2025 Q1

- Launch $ARTM Stake and Earn
- Official Product Release
- Alter-Trading Feature

2025 Q2

- Mobile Platform Release
- Alterim Marketplace
- Squad Feature

Core Team Member

Summer Lee   Founder/PM

- Over 8 years of experience as a product manager in web2 and web3, skilled in building consumer-targeted dapps for diverse users.

- Capable of developing beloved B2C dapps from zero to one, leveraging expertise in content, commerce, web3, and AI.

Donald Lee   Tech Lead

- Full-stack developer with a doctorate in AI and a strong interest in NFT-based dApps. Led NFT projects and developed applications that enhance NFT utility through AI

Avery   Design Lead

- L1 project Founding Designer with $100M with extensive experience in design, branding, and planning for product and IR materials.

- Launched several NFT projects on the ETH network since 2021, and true degen actively trades in CEX, DeFi, and launchpads.

Taylor   Senior Full stack dev

- Tech Lead of a Web3 data monetization project consortium with Korea's top bank and third-largest e-commerce.

- Founding engineer of a stablecoin project with $100M TVL and a DeFi project with $200M TVL on Ethereum.
